World Learning's approach to education is based on a holistic, multi-layered, and inclusive strategy that works directly with national governments, training institutions, schools, parents, and children.

We aim to educate, equip, and empower all program participants to improve learner knowledge, skills, and well-being. This involves strengthening both educational systems and the skills of individuals themselves. Our work builds off strengths and structures already in place as we expand access, increase equity, and improve the quality of the education delivery system.

Our programs and projects strengthen curriculums, advocate and educate about the need for social emotional learning in schools, train teachers on evidence-based teaching and learning practices, and expand inclusive learning environments.

“Progressively, social emotional learning is being integrated into our teaching style, which will bring a qualitative shift in enhancing the school's setting and student's wellbeing.”

PAUL DEMERDJIAN

*Educator from Dar Al-Mukhlis
High School, Lebanon*

World Learning's Approach to International Education

PROBLEM

In low- and middle-income countries, only 45% of children can read or understand a simple text, more than 60% fail to achieve minimum proficiency in math, and more than 250 million are not attending school. (WORLD BANK'S THE STATE OF GLOBAL LEARNING POVERTY: 2022 UPDATE)

OBJECTIVES

SYSTEMS STRENGTHENING
for sustainability

CO-CREATION
with local experts and stakeholders

DIFFERENTIATION
to meet varying levels of learners & educators

HUMAN-CENTERED & UNIVERSAL DESIGN
to meet the needs of all learners

CORE EXPERTISE & SOLUTIONS

WE OFFER CONCRETE SOLUTIONS

EARLY GRADE READING & WRITING: Systematic and explicit instruction, connected to students' lives and targeted at children's current level

FOUNDATIONAL MATH: Building procedural fluency, conceptual understanding and problem solving through interactive instruction, and hands-on activities that enable real-life application

INCLUSIVE EDUCATION: Using Universal Design for Learning, so that all learners can learn and reach their highest potential

21st CENTURY SKILLS DEVELOPMENT: Developmentally appropriate skills activities that fit learner needs, integrated into all aspects of a learner's journey

COMMUNITY ENGAGEMENT: For positive and powerful partnerships to support lifelong learning

ONLINE & DISTANCE LEARNING: Our distance and hybrid approaches keep learners engaged and connected through micro- and experiential learning

REMEDIAL & CATCH-UP PROGRAMMING: Targeted, step by-step progressions along core curricula, coupled with learning strategies and social-emotional learning support

TEACHER PROFESSIONAL DEVELOPMENT: Experiential & differentiated approaches, sustained through coaching and guided by data

CURRICULAR REFORM: Collaborating with local stakeholders to respond to local needs & values

FEATURED OUTCOMES

16,000 public school teachers have been trained in math and language pedagogical best practices and social emotional learning support for students.

1,794 teachers were trained and more than **160,000** public primary school students in grades 1-4 were supported with improved curriculum, instruction, and community support through the Quality Instruction Towards Access and Basic Education Improvement project.
